**Welcome to
the land of unlimited
transport options.**

Operating globally – with customised counselling
and tailor-made solutions.

On water, on land or in the air.

We are optimally linked internationally
and at home there where you are.
Worldwide and individual.

«As a family-owned enterprise, we ourselves determine the direction and speed of our development».

Wherever your goods need to be delivered, you can rely on our 75 years of experience and our complete, custom-made services.

For 75 years now, Lamprecht Transport has stood for individual transport and logistics solutions. A lot of tradition and a lot of experience for a family business, which is already being successfully managed by the fourth generation.

However, as an internationally active enterprise we do not rest on our laurels, instead, we continue to develop ourselves and our service offer further. We are committed to this every day – with over 300 employees and diverse subsidiaries in various specialised areas and markets. In recent years, for example, we have expanded our market position in the USA further by making new acquisitions. With our logistics centre in Pratteln / Switzerland, we round off our entire range of services and offer you, as a customer, additional potentials and capacities.

We are very proud to be active for a large number of renowned and globally operating companies. We take this as a great compliment to both ourselves and our employees, and we are confident we can also demonstrate to you modern, efficient and cost-effective solutions in the areas of transport and logistics that will help support your endeavours.

Gain an impression about Lamprecht Transport. The following pages provide an overview of our wide range of services and our family enterprise, now in the fourth generation. We look forward to receiving your valued contact.

Thomas Lamprecht, Chairman

- Worldwide transport and logistics solutions

Sea freight

Global sea freight – goods on all of the seven seas.

Wherever your goods are to be delivered – you can place your reliance in our many years of experience and our fully comprehensive sea freight services. Whether FCL or LCL, pre- or onward carriage, Cross Trades, hazardous or special transports – we know our way around when crossing the oceans. Not only on the sea, but also when it comes to customs formalities at home and abroad.

Temperature-controlled transports (Reefer) and regular collection containers, to and from various destinations around the world, are also a part of our standard offer. With our solutions we always align ourselves to your individual needs. Thereby, the correct choice of the shipping company and the most suitable mode of transport are crucial for a successful execution of the transport. Learn more about our complete range of services for your sea freight, or ask us about seaworthy packaging or necessary transportation insurance.

Our competent and reliable specialists are happy to advise and support you – and point out to you the advantages and disadvantages. We are here for you.

We handle general cargo, container payloads or project loadings with leading international shipping companies. Combined transports (sea / air freight) are ideal if the consignment has to reach its destination quickly but at less cost than pure air freight. Lamprecht Transport Ltd. can provide you with a complete quote for your ocean freight shipments.

An aerial, high-angle photograph of a large container ship at sea. The ship is viewed from a distance, showing its full length and the massive stack of colorful shipping containers (red, blue, yellow, and white) piled high on its deck. The ship is moving through the water, leaving a white wake. The sky is blue with scattered white clouds. The perspective is from a high vantage point, looking down at the ship and the surrounding ocean.

The most economical mode
of transport for goods
being moved worldwide.

When it needs
to go faster.

Air freight

We offer you a complete quotation for your airfreight transports.

Precision machinery or spare parts, medical technology, foodstuffs, pharmaceuticals – there are products that need to reach their destinations worldwide as quickly as possible. Lamprecht Transport Ltd. knows the best ways and means and offers you fully comprehensive services for air freight.

Accordingly, we select the most efficient and target-orientated solution for your specific needs. Whether by airline, routing or service – the correct choice is crucial for timely delivery of the goods and for the optimal price, quality and performance relationship.

For special transports such as Hand-Carrier, combined transport sea freight / air freight, charter, Express Products, hazardous goods and foodstuffs as well as Cross Trade deliveries our experienced and competent staff are always available to you with advice and practical assistance.

Firmly booked freight space capacities make even short-notice transports possible and that to uniquely competitive conditions.

Road transport

Whether general cargo, part and full loads in Europe and in Switzerland – we are at home everywhere with our road transport. We offer groupage transportation to and from all major destinations.

Our road transports in Europe

International partnerships and memberships in leading European general cargo co-operatives form a dense and high-performance network. Take advantage of a high density of departure and reliable running times, coupled with professional shipment processing by our experienced specialists. And this not just in distribution – we are also a reliable partner for your acquisitions.

Complete and part loads in Europe:

No problem, even if it should occasionally be larger. Exploit the benefits of our experienced dispatchers and their European charter fleet. Reliable and flexible all the way to your destination.

Our services in Switzerland

With our own modern vehicle fleet we can serve our customers throughout Switzerland within 24 hours – regardless of whether general cargo, part or full loads and, of course, also hazardous goods.

Our highly trained dispatchers are a byword for flexibility and reliability.

Courier and Express Transport:

Even when things have to be moved a little faster, we are here for you. We organise your express deliveries – quickly and without complication.

Packet services:

Take advantage of our direct connections to the national and international packet networks and benefit from our interesting conditions.

We are a partner of:

cargo²⁴

On the road for
you in Switzerland
and Europe.

No such thing
as can't do.

Special transport

The customised solution for every challenge.

Whether a company relocation is pending, a production site has to be dismantled, even if it is a hazardous goods, heavy and /or project transport – we implement individual special solutions from A to Z.

Complex projects are our mission – even for the detailed planning: Itinerary, loading and unloading equipment, utilisation of special vehicles, combined transport, insurance, definition of project stages, freight-specific carrier selection, laws of individual states, customs clearance, etc. We take on every logistical challenge and disburden you completely.

Hazardous goods transports

Trade Fair transports

Thermal transports

Project transports:

For project transports with exceptional demands, our competent and reliable specialists stand at your side with sound advice.

Hazardous goods transports:

We are the experts for the transport of hazardous goods and possess the relevant expertise for their competent processing – from load securing through to the hazardous goods documentation.

Trade Fair transports:

We help you to make your Trade Fair presence a total success. Our customised solutions, which we execute together with our long-term Trade Fair partners, offer warranty for this.

Thermal transports:

We can deliver your temperature sensitive goods in the shortest possible time to the most remote places in the world.

Customs services

So that borders do not mean an obstacle.

Borders are the gateways for global trade. As internationally operating transportation experts, we have amassed much experience and expertise in the customs clearance of different goods. Despite harmonisation and the gradual elimination of tariff barriers, in international trade the existing rules still need to be followed precisely. Improperly issued documents, the lack of permits or failure to comply with import and export prohibitions can quickly lead to unpleasant surprises.

We know all of the customs regulations and can process formalities quickly and reliably. Save time and let our experienced specialists work for you.

Our Customs Clearance Services for you:

- Swiss import and export clearance (NCTS, e-DEC)
- Free Pass and Carnet ATA clearances
- ATLAS import and export
- EU customs clearance
- Fiscal representation
- Bonded warehouse

A low-angle shot of several tall, silver flagpoles against a clear blue sky. The flagpoles are arranged in a diagonal line from the bottom left towards the top right. Various international signal flags are flying from the poles. From left to right, the visible flags include: a red flag with a white cross, a red flag with a white cross, a red flag with a white cross, a red flag with a white cross, a red flag with a white cross, a blue flag with a yellow cross, and a red flag. The flags are slightly blurred, suggesting they are moving in the wind.

Take advantage of our
extensive expertise.

Optimal in planning
and execution.

Logistics and warehousing services

Worldwide logistics solutions from Lamprecht Transport Ltd.

We offer you comprehensive services in the fields of warehousing and logistics. Packing, repacking, labelling, marking, neutralisation or packaging, just to name a few. Administrative tasks, such as creating dispatch documents, are of course also a part of our extensive portfolio of services, as is the warehousing of your products. Thanks to our state-of-the-art warehouse management solution, it also allows you to count on electronic data transmission and digital interfaces into your own software solution.

We have capacity not only across Switzerland, but also abroad. Whether bulky goods, small goods, hazardous goods or temperature-sensitive products, our high-bay warehouses and block storage areas are ready to handle your individual solution.

So, you can lean back – and confidently focus on your core business. You can rely on us. We would be happy to advise you in detail about a sophisticated and efficient logistic solution for your area of application.

An overview of our logistic services:

- Procurement and distribution logistics
- Outsourcing
- Warehouse management
- Temperature controlled storage
- Order processing
- Picking
- Packaging
- Neutralisation
- Labelling
- Packing

Environment, Safety & Quality

We take care of Mother Nature.

For Lamprecht Transport Ltd. environmentally friendly transportation and storage has always been a real concern. Accordingly, our freight forwarding professionals make every effort to process each transport as environmentally friendly as possible. This includes the highest possible utilisation of transport, the avoidance of empty runs, the optimisation of transport routes and on through to the separate disposal of packaging materials. Whenever possible we use ecological means of transport, such as combined transport (rail/road) and the Rhine ships as well as resource-saving paperless solutions (e-freight and customs clearance). In this way our thoughtful planning and the smooth processing of your assignment pays off for everyone in the long term. We will stay with it and conduct ourselves sustainably.

Safety and duty of care as a pillar of our success.

With selected basic training in the safety-relevant areas of concern (freight security as per FOCA guidelines, hazardous materials transportation, combating terrorism, securing loads, etc.) our employees are well trained and attend regularly refresher training. A milestone in terms of safety is the certification as an Authorised Economic Operator (AEO). This certification requires compliance with extensive measures in terms of reliability, solvency and fulfilment of high safety standards as well as strict adherence with relevant legislation. Enterprises in possession of an AEO certificate benefit from simplifications in security-related customs controls and simplified procedures in connected customs areas. Above all, this is particularly beneficial to clients of Lamprecht Transport Ltd.

Our quality concept.

The satisfaction of our customers is decisive about our success. For this reason we train our employees continuously in terms of quality, risk and safety. We rely not only on the use of modern technologies, but also on the progressive optimisation of our internal processes. These activities are sustainably and transparently supported by our documented quality management systems as per ISO 9001. For core and transport-specific elements, Lamprecht Transport Ltd. Basel and the logistics center Pratteln are SQAS audited and they have implemented HACCP.

Quality labels that give you the assurance of having chosen the correct freight forwarding/logistics partners:

At home in Switzerland, present around the world.

Whether on water, on land or in the air
– as a global transportation partner
we are well connected internationally
and at home there where you are.

Outgoing from our locations in Switzerland and in neighbouring countries, we offer you a global partner network. Our specialised services can also be found at several locations around the world. Whether in China, Dubai, USA or Germany, you can count on our reliability and our customised solutions, worldwide.

We are a member of the Swiss Freight Forwarding and Logistics Association SPEDLOGSWISS and work exclusively as per the «general conditions» enacted by them in their latest compilation, GC Spedlogswiss for transport and logistics and GC Spedlogswiss for warehousing business.
